REPLY TO NOTIFICATION OF DEFECTIVE RESPONSE

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
Attn: Mail Stop PCT, DO/EO/US

Sir:

In reply to the Notification of Defective Response mailed August 4, 2006 (copy attached), submitted herewith is a translation of the original claims.

Also submitted herewith is an English translation of the International Preliminary Examination Report.

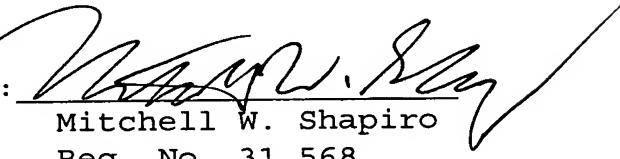

Confirming the recent telephone discussions with Ms. Karen Williams, of the DO/EO/US, it is understood that the previously submitted translation of claims is actually a translation of the Annexes to the International Preliminary

Examination Report. It is respectfully requested that the translation of the Annexes be entered for the purposes of Examination in the U.S. national stage.

The undersigned greatly appreciates Ms. Williams' assistance in this matter and apologizes for any inconvenience to the Office.

The Commissioner is hereby authorized to charge to Deposit Account No. 50-1165 any fees that may be required by this paper and to credit any overpayment to that Account. If any extension of time is required in connection with the filing of this paper and has not been requested separately, such extension is hereby requested.

Respectfully submitted,

By:

Applicant	RENESAS TECHNOLOGY CORP.	

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 4 sheets, including this cover sheet.

This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 14 sheets.

3. This report contains indications relating to the following items:

- I Basis of the report
- II Priority
- III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV Lack of unity of invention
- V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI Certain documents cited
- VII Certain defects in the international application
- VIII Certain observations on the international application

Claims 1 to 31

The inventions described in claims 1 to 31 involve an inventive step relative to documents 1 to 3 newly cited in the international preliminary examination report and document 4 cited in the international search report.

Documents 1 to 3 disclose a non-volatile memory cell having a channel region provided in between a first diffusion layer region and a second diffusion layer region

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP 02/08757

formed on a substrate, an electric charge storage layer provided on the channel region through a first insulating film, a first gate terminal provided on the electric charge storage layer through a second insulating film, and a second gate terminal which is provided on a second channel region adjacent to the first channel region directly under the electric charge storage layer and is connected through the first gate terminal and a third insulating layer, but none of documents 1 to 3 discloses a feature wherein, without modifying the structure of the non-volatile memory cell, a switching circuit is added, and the constitution is divided into a first non-volatile memory cell wherein stored information is erased in first data length units and a second non-volatile memory cell wherein stored information is erased in second data length units; this feature results in an advantageous effect which is not predictable from the disclosures of documents 1 to 3, namely, that the first non-volatile memory is used for storage of an encryption key, and the second non-volatile memory is used for the storage of a program.

Meanwhile, document 4 discloses the provision of an EEPROM array which can erase in units of bytes and a flash memory array, but the structure of the non-volatile memory cells differs from that of the inventions disclosed in documents 1 to 3, and thus, a person skilled in the art would not easily conceive of combining the inventions disclosed in documents 1 to 3 and document 4.
